

aulonã®

WE DO NOT BUILD MACHINES
but complete production lines

Since 2006 Aulona brand offers a customized product for any market need: New complete automatic production lines and packaging machines for sanitary napkins, panty shields, baby diapers, adult diapers, bed underpads and light and heavy incontinence products; special products for sanitary field;

Complete refurbishing and modifications of old production lines;

Qualified technical consultancy for upgrading or improving of existent automatic lines.

With its 15 years of activity, situated in the heart of the Abruzzo region known all over the world as "the baby Diapers Valley", Aulona Machinery became a very competitive reality thanks to its skilled and experienced personnel into industrial automation field.

Aulona Machinery grants a warranty period of 16 months which begins from the moment of the start of production in our customer's factory.

Moreover, all our production lines can be controlled and managed online from our offices in Italy by the remote control system. All our production lines are projected, realized and assembled following CE regulation.

A certificate is released to our production lines at delivery.

All our modules are enclosed in a plate where CE certification is shown.

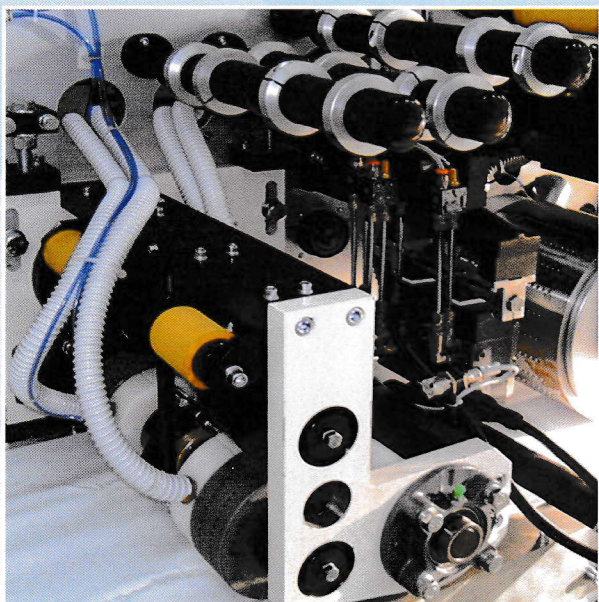

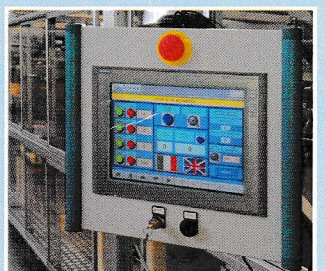

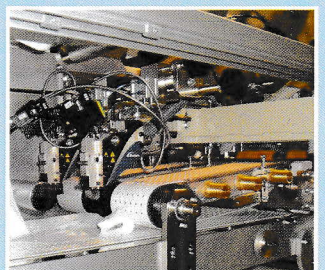

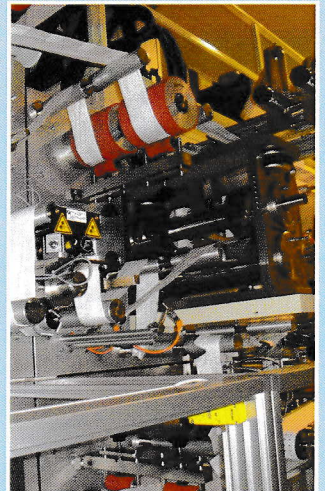

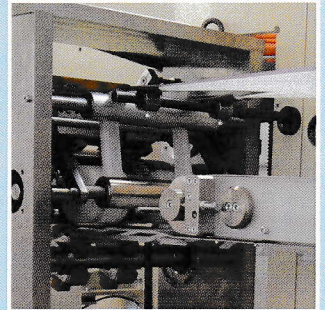

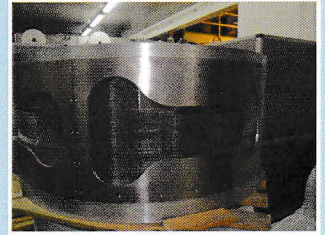

Our products are **100% MADE IN ITALY** included Spare Parts.

Our production lines are configured according to the final product, the number of sizes and the quantity of products per minute that our customer wants to produce. By receiving this information, we configure the line for the end customer, design its products and the layout of the line and finally issue our economic offer.

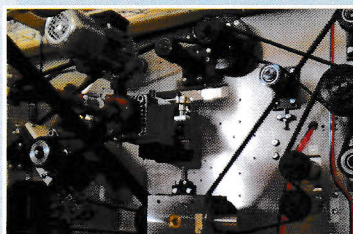

The lines offered are full servodriven (no mechanical transmission): no waste of time to adjust the materials during a changing size and complete control of the productive process.

Each production line is equipped with the camera quality control (vision system) which is completely customised and projected by our Software Department. This system allows to have the quality control of the product always under control and visible to everyone: from the operator to the company owner.

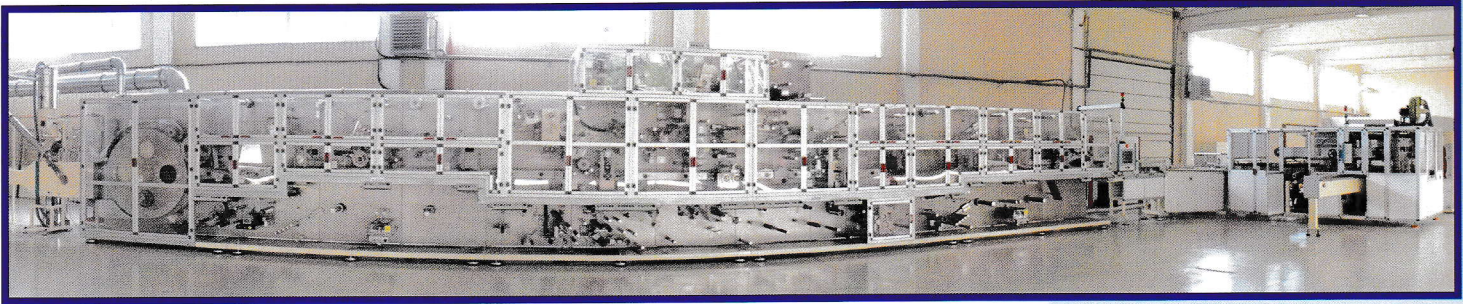

Moreover, all of our machines are designed, realized and assembled on a modular basis to allow for optimum product flexibility and integration of future upgraded.

**ALL
MADE IN

Refurbished production line

Aulona Machinery considers the process of refurbishing of old production line as if they were brand new.

We put the same attention on the product specifications that the customer wants to produce and redesign, modify and remake the production line according to them, as we do with new lines. Production lines are tested both in our plant and in the customer factory. For this reason, a warranty time is granted for each of them.

ALL MADE IN aulonă®

We are promoters of the ideology that all we produce must be "Made in Aulona" from filter to the packaging we are the only interface for our customer. True partnership is very important for each of us and when it means to make available high technology, experience and know-how.

*We are always ready to get new challenges,
to design products that suits our customer's needs
and develop new processes, because only through the
continuous innovation it's possible to achieve excellence
and be a step ahead to our competitors!*
